## Safety switch

Series Safety Hinge Switch SHS

## Description SHS-A1Z-SA-180

## Circuit diagram

Operating diagram

Fixing point fixed at $180^{\circ}$

## Tolerances:

switching angle (opening) $+2,0^{\circ} /-1,5^{\circ}$, direct opening torque $10 \%$, direct opening angle $+0,5^{\circ} /-3^{\circ}$
Switching angle hysteresis
(closing the N.C. contact -1,0 ${ }^{\circ}$ )
from the hinge's typical switch-off point

## Connection

Illustration with fixed shaft and sheared-off set screw.

| Electrical Data |  |  |
| :--- | :--- | :--- |
| Rated insulation voltage | $U_{i}$ | 250 V |
| Rated impulse withstand voltage | $\mathrm{U}_{\text {imp }}$ | $2,5 \mathrm{kV}$ |
| Conv. thermal current | $\mathrm{I}_{\text {the }}$ | 3 A |
| Rated operational voltage | $\mathrm{U}_{\mathrm{e}}$ | $230 \mathrm{~V} \mathrm{AC} / 60 \mathrm{~V} \mathrm{DC}$ |
| Utilization category |  | $\mathrm{DC}-13,60 \mathrm{VDC} / 0,5 \mathrm{~A}$ |
| Direct opening action | $\Theta$ | acc. to IEC/EN 60947-5-1, annex K |
| Short-circuit protective device |  | Fuse 4 A gG |
| Protection class |  | SELV |

| Mechanical data |  |
| :--- | :--- |
| Enclosure | $\mathrm{GD}-\mathrm{Zn}$ |
| Cover | $\mathrm{GD}-\mathrm{Zn}$ |
| Wing | $-25^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$ |
| Ambient air temperature | 1 Change-over |
| Contact type | $1 \times 10^{6}$ operating cycles |
| Mechanical life | max. 1200 switching operations / hour |
| Switching frequency | $4 \times \mathrm{M} 6$ screws DIN 7984 or DIN 6912 |
| Attachment | plug M12 x1, metal thread |
| Connection type | $\approx 0,4 \mathrm{~kg}$ |
| Weight | operator definable |
| Installation position | IP 67 in acc. with IEC/EN 60529 |
| Protection type | $+/-3^{\circ}$ from fixing point |
| Switching angle | $+/-10^{\circ}$ from fixing point |
| Direct opening angle | $1,5 \mathrm{Nm}$ |
| Direct opening torque | $\mathrm{F}_{\mathrm{R} 1}=$ max. 1000 N |
| Mechanical load | $\mathrm{F}_{\mathrm{R} 2}=$ max. 500 N |
| (see dimensioned drawing for the |  |
| introduction direction of the forces) | $\mathrm{F}_{\mathrm{A}}=$ max. 750 N |

| ID for safety engineering |  |
| :--- | :--- |
| B10d | $2 \times 10^{6}$ switching cycles |

| Standards |  |
| :--- | :--- |
|  | VDE 0660 T100, DIN EN 60947-1, IEC 60947-1 |
|  | VDE 0660 T200, DIN EN 60947-5-1, IEC 60947-5-1 |
| DIN EN ISO 13849-1 |  |

| EU Conformity | acc. to directive 2006/42/EC |
| :--- | :--- |

| Approvals |  |
| :--- | :--- |
|  | ${ }^{2} \mathrm{CSA}_{\text {Us }} \quad \mathrm{C} 300$ |

## Notes

The safety fixture must always be attached by at least two SHS! See max. load.
If the risk assessment of the machine permits a single-channel evaluation, an empty hinge can be used as the support element.
If the SHS is used at an ambient temperature of $70^{\circ} \mathrm{C}$, it is possible that the connecting cable will age more rapidly!
The connecting cable must be protected against mechanical damage.
The cable can be installed in tubes or cable ducts.
The manufacturer / supplier of the machine / system is obligated to observe the applicable standards for the size of the safety intervals between the separating safety fixture and the hazard point.
These regulations include: EN 294, EN 349, EN 953, EN 1088, ... .
The switch may not be used as a stop.
For a CSA/UL application it is essential to use CSA/UL approved cable for connection.
The suggested protection type (IP code), applies only when at least an equivalent cable coupling is used.
