## Actuation

The actuating device is preferably started from 2 sides.
By loosening the 4 screws the actuation assembly can be rotated in 90 degree increments such that 8 actuation directions are possible.
The actuation assembly is to be again fastened to the housing using the 4 screws.

## Standards

## EU Conformity ${ }^{1}$

## Notes

The degree of protection specified (IP code) applies only to a properly closed cover and the use of an equivalent cable gland with adequate cable.
${ }^{1)}$ To be conform with the EMV guideline (2014/30/EU) a shielded connection cable has to be used.
