Industrial Enclosures

Industrial Enclosures

Since 1984, Altech Corporation has grown to become a leading supplier of automation and industrial control components. Headquartered in Flemington, NJ, Altech has an experienced staff of engineering, manufacturing and sales personnel to provide the highest quality products with superior service. This is the Altech Commitment!

Altech's line of industrial enclosures are manufactured by els Spelsberg, a company well known in Europe for its quality enclosures. Their fully automated manufacturing facility produces more than 100,000 enclosures per day. At any given time, approximately one million enclosures of various sizes and types are in inventory, ready for immediate shipment to customers worldwide.

Our well trained technical experts welcome the opportunity to answer your technical questions and provide solutions to your automation and control needs. Give us a call or visit www.altechcorp.com.

Quality Commitment

Altech's control components meet diverse national and international standards such as UL, NEC, CSA, IEC, VDE and more. Altech provides superior customer service and delivery through Total Quality Management and Continuous Process Improvement. Altech is ISO 9001 approved. We perform these services with honesty and integrity and are committed to achieve these goals.

Terms and Conditions 162

No matter the application or condition we have your components covered.

Altech enclosures by els spelsberg provide needed protection in a functional and creative way, while enhancing the value of your product with their appealing designs.

Whatever your application, you can rely on our enclosure to meet the most demanding requirements for housing and protecting components and devices. And we do it with functional, yet appealing designs that can enhance the value of your product. From light to heavy duty industrial or marine environments, our family of enclosures secure and protect control components, DIN rail mount terminal blocks and circuit breakers, switches, meters, printed circuit boards, as well as instruments and sensors.

Using state of the art machining, we can equip your enclosures with terminal blocks and other custom components to meet your special requirements.

BENEFITS

Rustproof
- Polycarbonate/Polystyrene enclosures will last indefinitely without corrosion

Visibility
- Components and devices are fully visible through transparent covers, while completely protected and insulated

Impact Resistant
- Non-metallic enclosures withstand bumps and blows, they will not dent

Maintenance Free
- Surface finish does not deteriorate and requires no special painting or refinishing

Chemical resistant
- Resist weak and strong acids and alkali

Lightweight
- Non-metallic enclosures weigh significantly less than metal, simplifying handling

Flexibility
- Enclosures can be easily customized

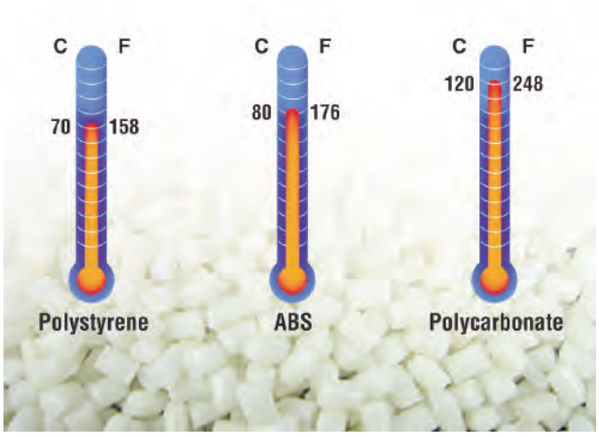

Illustrated are just a few of the applications for our enclosures.

DESIGN FEATURES

Smooth or Knockout Sidewalls

Smooth sidewalls provide for installation of custom openings for wire, cable, conduit fittings, or mounting of devices
(TK, EK Series). Sidewall knockouts provide factory molded knockouts conveniently positioned for wire, cable or conduit fittings. They are quickly and easily removed by pushing out after scoring.

Materials

Only flame retardant polystyrene, ABS or glass filled polycarbonate materials are used to meet the requirements of UL94 and VDE 0471.
Polycarbonate is suitable for temperatures up to 120°C (248°F), ABS is rated for temperatures up to 80°C (176°F) and 70°C (158°F) for Polystyrene. Polycarbonate is UV stabile making it the appropriate choice for outdoor applications.

Customization

Our enclosures can be factory supplied with custom openings. Using state of the art machining, we can punch, drill, mill or cut to your most exacting specifications. We customize quickly and accurately, ... at a reasonable cost!

Colors

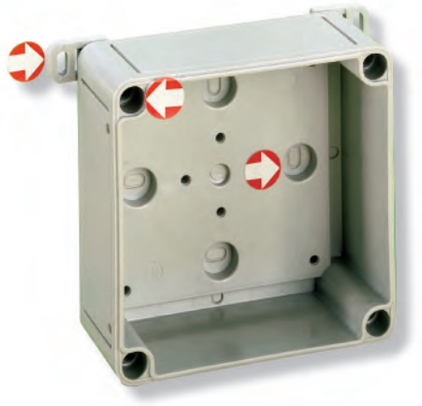

The standard color for the enclosure base is light gray. Covers are available in gray or tinted transparent (TK, EK, AK Series). Custom colors are available in production quantities upon request.

DESIGN FEATURES

Protection

Protection up to IP67 (NEMA 4, 4X) can be attained depending on enclosure series and fittings selected.

Enclosure Mounting

Altech enclosures by els spelsberg can be mounted directly onto a panel, frame or other mounting surface through corner mounting holes, knockout holes molded into the base, or optional mounting tabs. Sealing caps for base mounted screws are included.

Note: Corner hole or flange mounting is required to maintain the NEMA 4X rating on TK and EK Enclosures.

Covers

Covers are available in alternate heights, in standard gray or tinted transparent. Quick release, polyamide screws make cover removal easy.

Enclosure Printing

Three Altech printing options are available; digital printing, screen printing and adhesive labels. Printing customizes the enclosure giving it a professional look. This service is offered even at low initial production quantities.

DESIGN FEATURES

Combination Kits

Enclosures can be combined to create layer units or special configurations with the use of combination kits. The combination kit ensures that the degree of protection will be maintained. Refer to page 149 for ordering information.

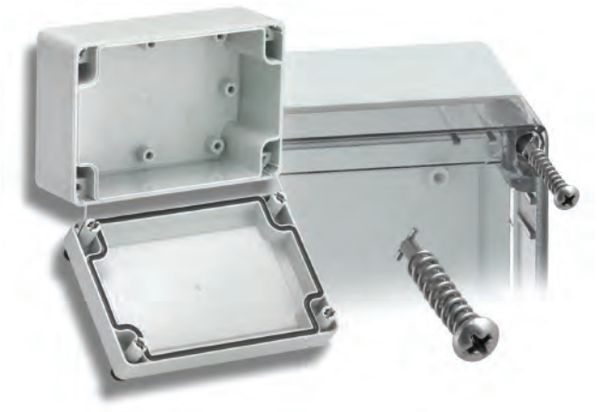

EMI/RFI Coating

The TK Series Enclosures can be EMI/RFI shielded. The enclosures are internally vacuum coated with conducting metal. This coating effectively protects valuable equipment from electromagnetic interference and electrostatic discharge.

Hinge Kits

Hinges maximize accessibility. They are supplied as kits, complete with mounting instructions, hardware and a mounting template. Hinges do not compromise NEMA or IEC ratings when installed to factory guidelines or when factory installed. Refer to page 150 for ordering information.

TG Series Unique Design

The TG series incorporates design features to make work faster, easier and more efficient. All TG Enclosures have integral cover retainers. This captive lid often eliminates the need for additional hinge sets while keeping the lid close at hand. Quick turn screws are optional on the TG series. These screws feature 1/4 turn functionality for fast, reliable access to the enclosure. A simple 1/4 turn releases the screw, pushing the screw back in and another 1/4 turn secures it.

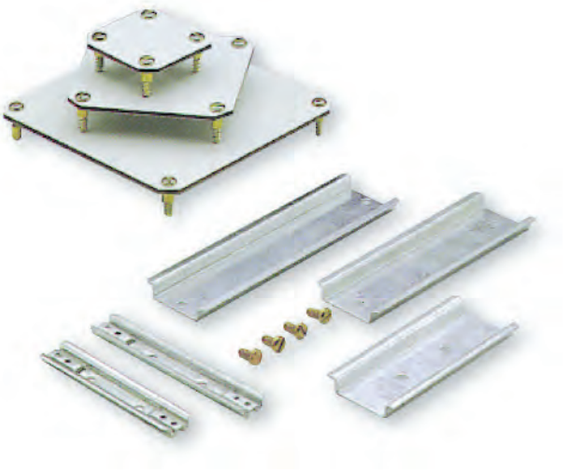

DESIGN FEATURES

Seals

A groove and lip type seal design is used on most series to provide the highest possible degree of protection. The seamless polyurethane seals are automatically injected into the grooves, insuring consistent quality.

Having excellent memory characteristics, our seals will not dry out, crack or deteriorate.

Mounting Plates and DIN Rails

Mounting plates and DIN rails are supplied as kits complete with screws and spacers where needed. Mounting plates are used to attach components and devices having specific hole patterns that do not match standard base mounting provisions. Refer to pages 149-151 for specifying and ordering information.

Fittings

Fittings are an important part of the enclosure's sealing system. To satisfy the appropriate NEMA and/or IEC requirements, the proper fittings must be selected. For our wide selection of Pg, metric and NPT fittings, refer to pages 150-152.

Function Guarantee Fire Protection

WKE Series junction boxes protect electrical installations during a fire for critical systems such as emergency lighting, ventilation systems and lifts. Flame protection is provided for 30 to 90 minutes, depending on model, and water ingress protection up to IP65. Typical applications include tunnels, mining operations, high rise buildings and other areas where evacuation route power must be maintained for life saving escape routes and rescue equipment. Please consult Altech for more information on these specialty products.

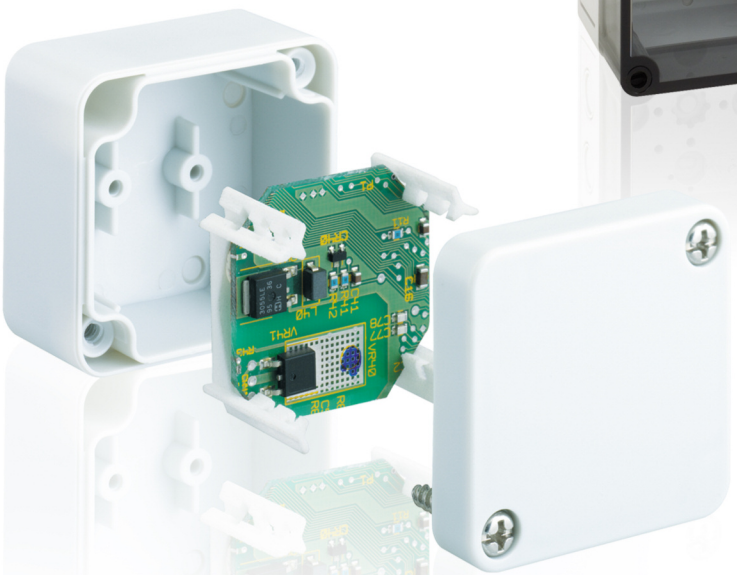

TK Series

Designed for tough industrial environments and a wide variety of applications, TK Enclosures are available with standard gray or tinted transparent covers in several heights. Sidewalls are supplied smooth or with knockouts. Precision molded from impact and flame resistant materials, they offer functionality and appealing solutions for diverse application requirements.

- 18 different enclosures with up to 3 different cover heights
- IP66 (NEMA 4X)
- Polystyrene or Polycarbonate
- Gray or tinted transparent covers
- Smooth sidewalls or sidewalls with knockouts
- Four cover mounting screws
- Tongue and groove with polyurethane gasket (CFC free)
- Gasket inserted by robots
- HF - EMC models available
- Knockout mounting holes in enclosure base
- Screw fastening cover design requires six turns to lock
- Dust and moisture proof
- Non flammable and halogen free

TG Series

Featuring an attractive, high-gloss finish, the TG enclosure series is manufactured from high-quality plastics, with a choice of ABS or Polycarbonate for unsurpassed industrial quality. These high quality materials are impact and flame resistant as well as being halogen free. Rated to protection class IP 67, they are not only dustproof but also reliably protect installed electrical or electronic equipment against ingress of water during short-term submersion. The TG series therefore satisfies the most demanding applications and provides sure protection in harsh industrial environments even for highly sensitive electronics.

- 16 sizes available
- IP67 (NEMA TYPE 4X)
- ABS or Polycarbonate
- Gray or transparent covers
- Smooth Sidewalls
- Stainless Steel cover screws (choice of standard screws or 1/4 turn quick release screws)
- Integral cover retainers
- Integral mounting studs in base
- Recessed cover for label inlays or membrane keypads
- Flame resistant and halogen free

The TG Advantage

Recess in cover for inlays.

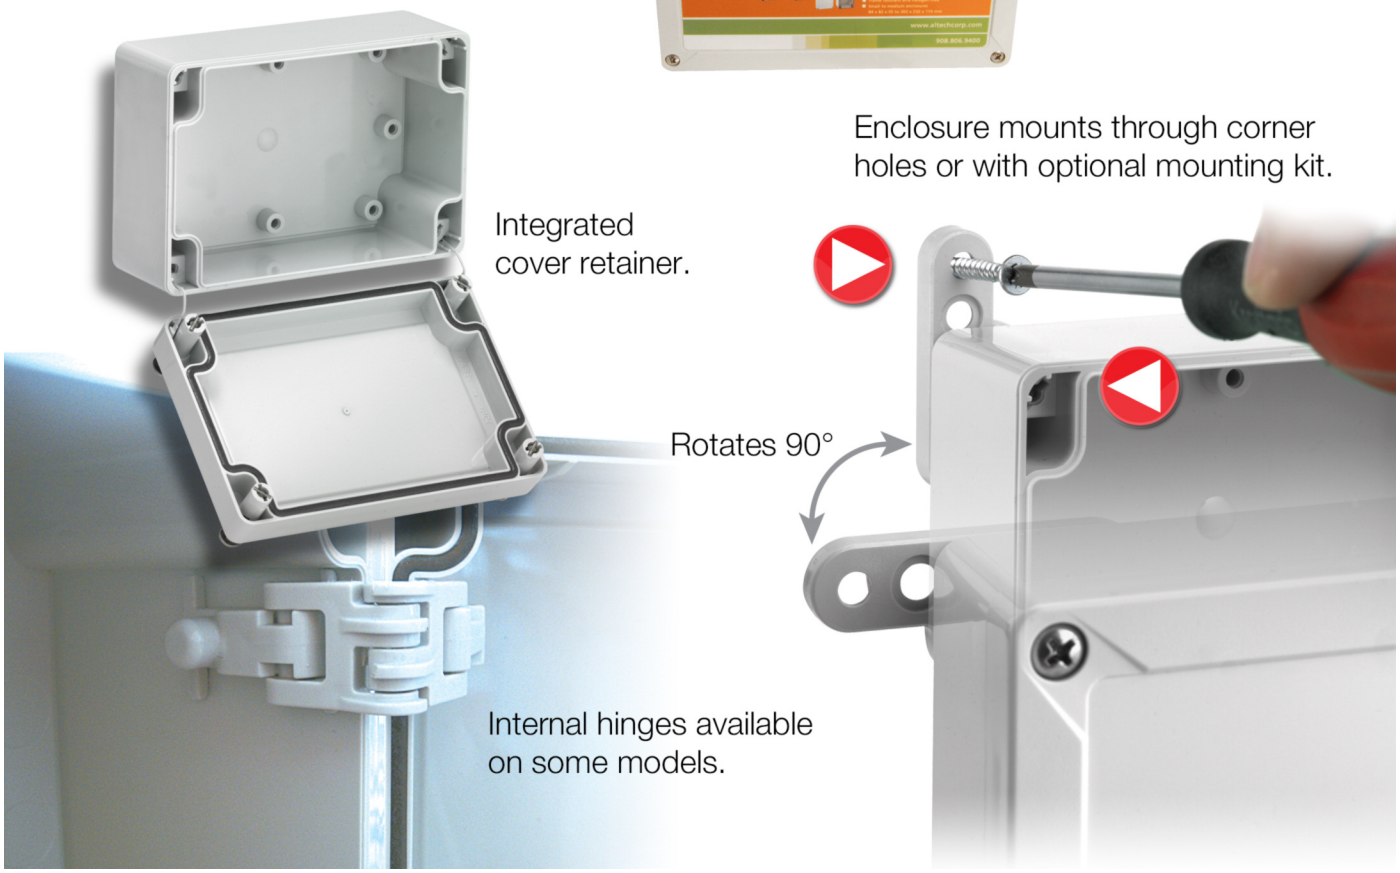

Quick Turn Screws
Open or Close with 1/4 Turn

Enclosure Printing.
Digital printing, screen printing
and adhesive labels.

Enclosure mounts through corner
holes or with optional mounting kit.

Integrated
cover retainer.

Rotates 90°

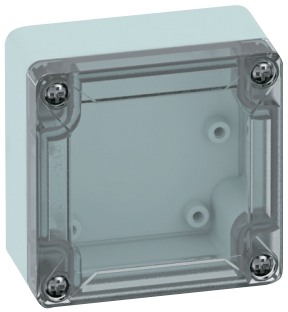

Internal hinges available
on some models.

AL Series

The enclosures of the AL Series are constructed of cast aluminum material. The enclosure base and cover are connected with pre-mounted, stainless steel cover screws (compatible with both Phillips and straight blade screwdrivers). The foam seal in the key/slot system guarantees an IP66 ingress protection and long lasting service life. A high quality coating covers and protects the enclosure from weather and corrosion. Several international safety certificates insure the overall quality of the AL Series.

8 new enclosure sizes have been added to the AL series. These enclosures are called TK AL enclosures because the sizes were taken from the most popular sizes in the TK enclosure series. The inside dimensions match those of the comparable TK version. These new enclosures were also designed with UL approvals in mind. UL approval is currently pending on these parts but they will soon have UL listing with a NEMA 4X Type rating in early 2015.

The complete series of 24 enclosures ranges from 50 x 45 x 30 mm to 388 x 270 x 117 mm.

The exterior of the enclosure is protected by powder coating (silver-gray - RAL 7001) and combines an elegant appearance with outstanding protection against corrosion.

The enclosure material (Al Si 12) ensures both a high degree of impact resistance (>7Nm, DIN 50014) and continued operation in extreme temperatures.

The advantages of the AL Series include:

- IP66 protection, which is necessary for industry approval.
- High degree of resistance to chemicals and other damaging materials.
- Protection against electromagnetic interference (EMI).

The specially designed AL Series accessories make the AL Enclosures flexible and highly secure.

The external mounting tabs allow for solid and safe wall mounting of the AL Enclosures. The installation of the clamps to the enclosure can be varied up to 90 degrees.

Through the use of external hinges, the covers of the AL Series can be converted into hinged doors. This is especially useful when devices such as push-button systems are integrated into the enclosure. The external hinges, constructed of cast aluminum can be swiveled up to 150 degrees.

With the help of the steel mounting plates, even large and heavy components can be securely mounted. The mounting plates are available from enclosures AL 88-6 and larger.

Abox Series

The NEW Abox family consists of eight enclosure sizes that feature an attractive modern design and shape that allow for optimum use of installation space. Each enclosure has either membranes or knockouts on each sidewall and on the backside.

Five of the eight enclosures in this family feature "Dual Molding Technology". This feature incorporates self sealing elastomer membranes molded right into the polypropylene body. This allows the user to simply push wires through the membrane or cut them out to install a cable gland. These access holes can accommodate metric cable glands and entry spouts. The number of knockouts has been increased in this newly designed series.

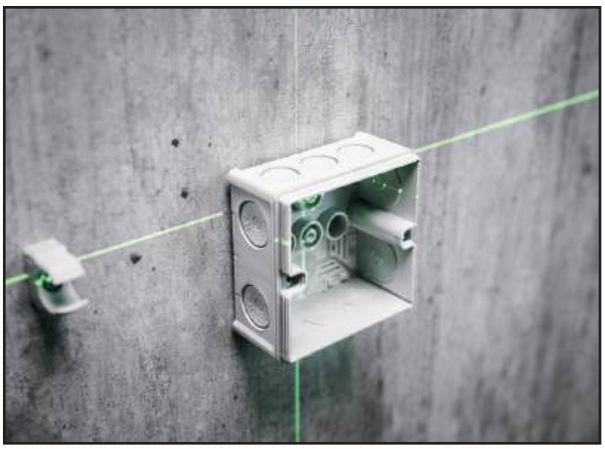

Abox Enclosures are available in sizes ranging from 87 x 87 x 52 mm (3.43 x 3.43 x 2.05 in.) to 252 x 252 x 120 mm (9.92 x 9.92 x 4.72 in.).

These enclosures have an IP66 protection rating and are suitable for indoor or protected outdoor use.

- Two to four high grade self taping screws secure the lid
- Tongue and groove sealing system with thermoplastic elastomer seal.
- Made from non-flammable Polypropylene

CONVENIENCE AND RELIABILITY

Abox Enclosures are manufactured in Polypropylene and are approved by several international test agencies. The unique design of Metric-Membranes allows for installation of large or small cables, cable glands, conduits, and entry spouts while ensuring that the enclosure remains sealed and all housed components are protected.

Center markings
Perfect alignment in record time.

Using the center markings on the box, the Abox can be optimally aligned in seconds, by laser for example.

Internal mounting
Quickly and easily onto the wall.

Wall mounting is straightforward thanks to the internal fixing points. The screws stay in place due to the membranes.

One for all / Pozidriv/slotted head (PZ/S)
No more laborious tool changes.

Only one screwdriver is needed for use with all the screws on the terminal and cover of the new Abox series.

Larger interior space
Wiring made easy.

Maximum wiring freedom and ease of working thanks to the larger internal space of the new Abox series.

A Modern Terminal Technique

With our new Abox Enclosures wiring is as easy as 1-2-3. Large numbers of cables from 20 AWG to 2 AWG depending on the enclosure size, can be easily installed. Smaller enclosures are available with push-in spring clamp terminals while the larger enclosures are available with highset screw clamp terminals.

Abox 025 – Polypropylene – 87 x 87 mm (3.43 x 3.43 in.)

Standard Features

- **Protection Level:** IP66
- **Technical:** Self Sealing Soft Elastic Membranes Suitable for Metric Entry
- **Sealing Area:** M16/M20 - 4 to 16mm
- **UL Recognized Enclosure Material:** Polypropylene
- **Gasket Material:** Thermoplastic Elastomer
- **Color:** Light Gray, White or Black
- **Material Operating Temperature Range:** Polypropylene -25˚C to 55˚C (-13˚F to 131˚F)

Abox Pro Series

Abox Pro Series (formerly the Abox-i Series) junction boxes for harsh environments can be used wherever extreme conditions are encountered: offshore platforms, ocean vessels, petrochemical plants, agriculture, steel mills and railways.

These enclosures are similar to the Abox series but made in a stronger material with a more rugged design. The two series share similar features like terminal offering, mounting options and basic design. However the Abox Pro series is suitable for use in unprotected outdoor environments.

- Direct mount
- Glass reinforced Polycarbonate
- Integral seal
- Impervious to sea air and water
- IP66/67/69 protection
- High temperature resistance
- High mechanical strength (IK09)
- Corrosion and maintenance free
- Halogen free
- Standard knockouts
- 7 different sizes
- Contemporary styling
- UV fade resistance for optimal outdoor use
- High chemical resistance
- Wire sizes from 2.5mm^2 sq. to 35mm^2 sq. (14-2 AWG)
- Ideal for installations in high risk fire areas

Altech Corp.® • 35 Royal Road • Flemington, NJ 08822-6000 • Phone (908)806-9400 • FAX (908)806-9490 • www.altechcorp.com

CONVENIENCE AND RELIABILITY

Abox Pro enclosures are manufactured in Polycarbonate and are approved by several international test agencies. The new enclosures have high impact resistance and protect against water, heat and sunlight.

Extremely robust
Temperatures from -35°C to +80 °C.

Heat, cold, humidity or direct sunlight - the new Abox Pro can withstand the most adverse outdoor conditions without any problems.

Industry
For industry and extreme conditions.

With an impact resistance of IK09, high chemical resistance and temperature resistance of up to 80°C, the Abox Pro offers durable protection in extreme applications.

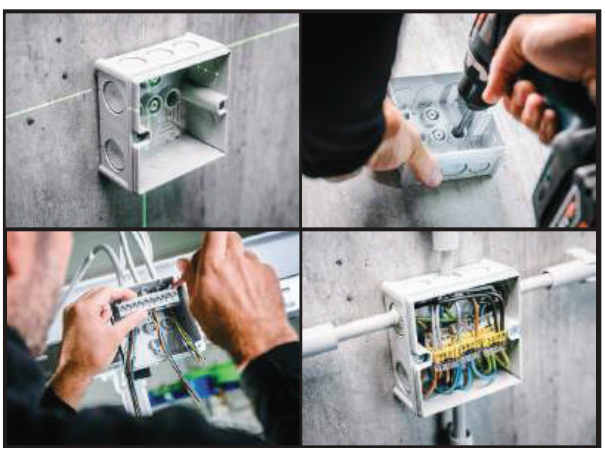

Agriculture + farming
Safety for people and animals.

Electrical installations in agriculture require reliable protection. Influences such as dust, moisture and ammonia make it necessary to use materials with DLG certification.

No compromises in safety.

For us it‘s mandatory: the entire Abox series is subject to extensive testing and certifications. It is VDE and DLG certified. The DNV certifications means that the Abox Pro version is approved for use in shipping and maritime applications.

Abox & Abox Pro Series Features

The Abox Pro series offers the same terminal and mounting features as the standard Abox series, see intro page for more details on these features.

- **Center markings - Perfect alignment in record time**
- **Internal mounting - Quickly and easily onto the wall**
- **Larger interior space - Wiring made easy**
- **A modern terminal technique**

Abox Pro 025 – Polycarbonate – 92 x 92 mm (3.62 x 3.62 in.)

Standard Features

- **Protection Level:** IP66/IP67/IP69
- **Technical:** Knockout Sidewalls (M16/M20)
- **UL Recognized Enclosure Material:** Polycarbonate
- **Gasket Material:** Thermoplastic Elastomer
- **Color:** Light Gray or Black
- **Material Operating Temperature Range:** Polycarbonate -35˚C to 80˚C (-31˚F to 176˚F)
- **Included Accessories:** (4) M20 Double Membrane Seals for 7-13mm Cables, Cover Retainer
- **Accessories:** See section below

AKL Series

AKL Enclosures are very similar to their door bearing cousins, the AKII. The main feature that differentiates this family from the AKII is the configuration of the covers and bases.

The AKL Series, like the AKII Series, features aesthetically pleasing smooth exterior walls. Knockout patterns are on the inside, except on the top where standard knockouts exist.

The AKL Series offers larger sizes, ranging from 150 x 300 x 142 mm (5.91 x 11.81 x 5.59 in.) to 600 x 300 x 210 mm (23.62 x 11.81 x 8.27 in.). Some models feature low or high covers, available in gray or tinted transparent. Standardized dimensions allow for joining multiple AKL Enclosures or combining AKII and AKL Enclosures with a common combination kit to create larger enclosure combinations.

As with the AKII, the AKL family features the same 150 mm (5.91 in.) center to center DIN rail spacing. The standard ingress protection level when using appropriate strain reliefs is IP65.

AKL has you covered

External mounting tabs
(sold separtely)

EK Series

Compact EK Series Enclosures are designed to house and protect standard IEC components, such as DIN rail mount circuit breakers, switches, meters and other control devices.

The unique cover design features a shrouded cut out and transparent hinged doors, for quick access and visibility. The shrouded cut out, spanning the width of the cover, exposes mounted components for easy adjustment and isolates wiring for increased safety. The transparent hinged doors have push release latches and can be optionally equipped with a tamper seal.

- UL Listed
- Direct mount
- Small to medium size
- Polycarbonate base and cover
- Integral seals
- Dust and moisture proof
- IP65 protection
- High mechanical strength
- Corrosion and maintenance free
- Halogen free

EK compact design

The EK Series features compact dimensions for space-efficient installation, while offering sufficient connection space for a secure wiring job.

The transparent doors make for an ideal display of timers, LEDs, circuit breakers, and other DIN rail mount devices. Access to components is quick and easy.

EK002 – Polycarbonate – 130 x 94 mm (5.12 x 3.70 in.)

Standard Features

- **Protection Level:** IP65 - Nema Type 4x
- **Technical:** Fits 2 Circuit Breaker Poles
  (3 if side pieces are removed)
  Smooth Sidewalls
  Tinted Transparent Door
- **Enclosure Material:** Polycarbonate
- **Door Material:** Polycarbonate
- **Gasket Material:** Polyurethane
- **Material Temperature Range:** -40°C to 120°C (-40°F to 248°F)
- **Color:** Light Gray
- **Included Accessories:** 35mm DIN Rail
  Label Strip
- **Accessories:** See section below

AK Series

The AK Series are small to large enclosures designed to house and protect standard IEC components, such as DIN rail mount circuit breakers, switches, meters and other control devices. Larger than the EK Series, they offer increased capacity for mounting components and provide additional space for more convenient wiring.

The unique cover design features a shrouded cut out and transparent hinged doors for quick access and visibility. The shrouded cut out, spanning the width of the cover, exposes mounted components for easy adjustment while isolating wiring for increased safety. Doors have push release latches with reversible hinge feature to open from the left or right side. Keylocks can be added to the doors for increased security. Most enclosures are supplied with removable terminal strip assemblies for ground / neutral distribution and DIN rails.
Equipped with pre-installed entry plugs, these enclosures provide IP65 protection. Use of appropriate sealing connector assemblies for wire, cable or conduit entry can maintain IP65 protection. Using the entry spouts provided, enclosures have IP54 protection.

- Direct mount
- Corrosion and maintenance free
- Small to large size
- Polystyrene or Polycarbonate base and cover
- Polycarbonate transparent doors
- Integral seals
- High mechanical strength
- Dust and moisture proof
- Halogen free
- Up to IP65 protection

AK - IEC Protection

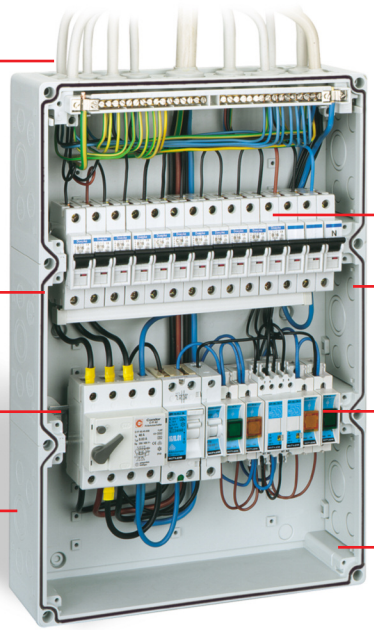

M20/Pg13.5 double membrane entry seals guarantee IP65 protection. These entries are also suited to accept threaded cord grips.

Removable sidewalls facilitate and allow enclosure combination with other AK or AKL models.

DIN Rail distance of 150 mm (5.91 in.) center to center gives room for comfortable and timely installations.

Smooth external sidewalls combine functionality with aesthetics.

Up to 14 components can be mounted to each DIN rail.

The enclosure material is impact and flame resistant Polystyrene.

Snap in 35 mm DIN rail.

The large number of pre-punched “holes” makes for easy cable installation.

AK03 – Polystyrene and Polycarbonate - 100 x 150 mm (3.94 x 5.91 in.)

Standard Features

- **Protection Level:** IP65
- **Technical:** Fits 3 Circuit Breaker Poles
  Knockout Sidewalls and Installed Double Membrane Seals
  Tinted Transparent Door
- **UL Recognized Enclosure Materials:** Polystyrene or Polycarbonate
- **Door Material:** Polycarbonate
- **Gasket Material:** Polyurethane
- **Material Temperature Range:** Polystyrene
  -40˚C to 70˚C (-40˚F to 158˚F)
  Polycarbonate
  -40˚C to 120˚C (-40˚F to 248˚F)
- **Color:** Light Gray
- **Included Accessories:** DIN Rail, 2x4 Pole Ground/Neutral Terminal Strip, Filler Strips, (3) M20 Double Membrane Seals

Knockout Detail

AK 14 – Polystyrene and Polycarbonate – 300 x 300 mm (11.81 x 11.81 in.)

Standard Features

- **Protection Level:** IP65
- **Technical:** Fits 14 Circuit Breaker Poles
  Knockout Sidewalls and installed double membrane seals
  Tinted Transparent Door
  Multiple Enclosure Combination Option
- **UL Recognized Enclosure Material:** Polycarbonate
- **Door Material:** Polycarbonate
- **Gasket Material:** Polyurethane
- **Material Temperature Range:** Polycarbonate
  -40˚C to 120˚C (-40˚F to 248˚F)
- **Color:** Light Gray
- **Included Accessories:** DIN Rail, 17 Pole Ground/Neutral Terminal Strip, Cable Shield, Filler Strips, Label Strip, (5) M20 Double Membrane Seals, (2) M25 Double Membrane Seals, (1) M32 Double Membrane Seals, (1) M40 Entry Spout
- **Accessories:** See section below

AK 70 – Polystyrene and Polycarbonate – 900 x 300 mm (35.43 x 11.81 in.)

Standard Features

- **Protection Level:** IP65
- **Technical:** Fits 70 Circuit Breaker Poles (14 per section)
  Knockout Sidewalls and installed double membrane seals
  Tinted Transparent Door
  Multiple Enclosure Combination Option
- **UL Recognized Enclosure Material:** Polycarbonate
- **Door Material:** Polycarbonate
- **Gasket Material:** Polyurethane
- **Material Temperature Range:** Polycarbonate
  -40˚C to 120˚C (-40˚F to 248˚F)
- **Color:** Light Gray
- **Included Accessories:** (5) DIN Rails, 2x27 Pole Ground/Neutral Terminal Strip, Cable Shield, Filler Strips, (5) Label Strips, Accessory Case (15) M20 Double Membrane Seals, (2) M25 Double Membrane Seals, (1) M32 Double Membrane Seals, (1) M40 Entry Spout
- **Accessories:** See section below

The Q Series Low Voltage Wire Management Solution

Your competition left this mess.

Q 12-SB-L

You cleaned it up without having to cut and resplice.

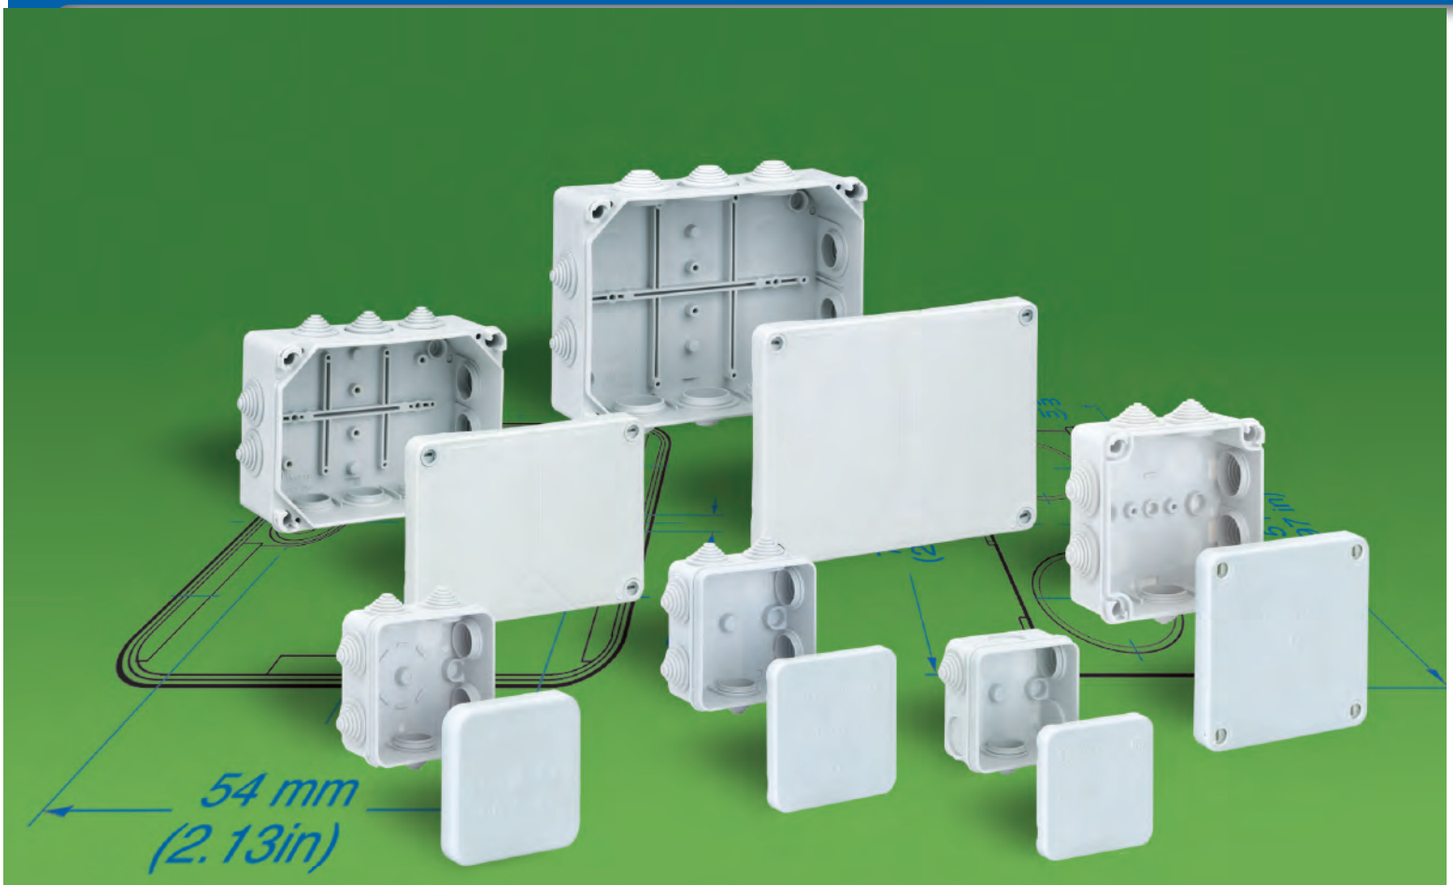

Q 4-L

Q 12-L

Using the Q Series data & signal wiring enclosure is fast and easy. Even if the splicing mess already exists. Simply mount the polypropylene enclosure using its convenient mounting ears with a screw or zip strap. Then press the wires into the Q Series unique retaing slots and snap on the cover and your done.

Available sizes:

Q 12-L – Polypropylene – 85 x 85 x 37 mm (3.35 x 3.35 x 1.46 in.)
Q 12 SB-L – Polypropylene – 85 x 85 x 37 mm (3.35 x 3.35 x 1.46 in.)
Q 4-L – Polypropylene – 56 x 40 x 23 mm (2.20 x 1.57 x 0.91 in.)

HP Series

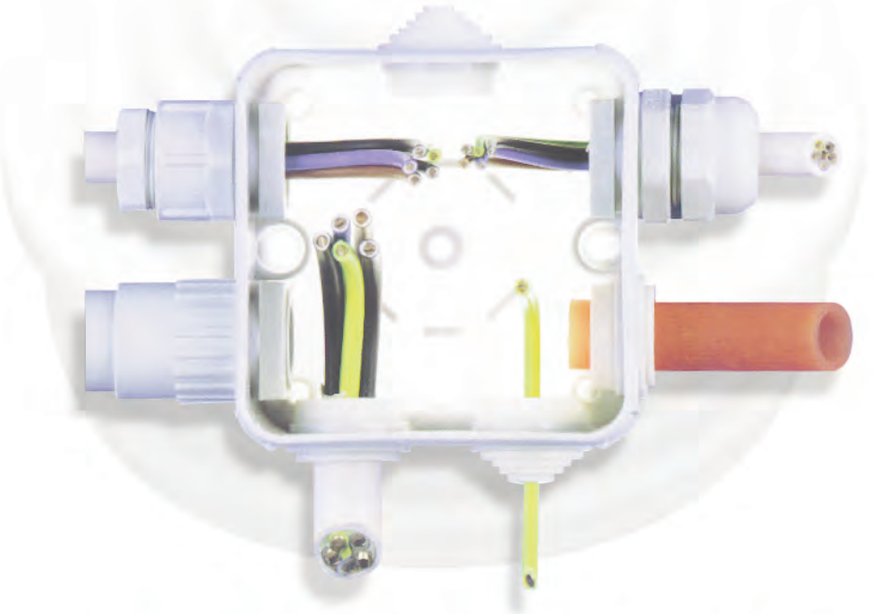

The HP Series are economy junction boxes for lighter duty applications. The HP70, 80 and 90 feature snap on covers, while the HP100, 150 and 190 feature 4 quick release screws. HP Enclosures are supplied with universal entry seals that can be easily cut to create the required wire, cable or conduit adapter opening. These universal entry seals provide protection up to IP55.

The preinstalled entry seals in the HP Series can accommodate a wide variety of connection possibilities. Large or small cable, cable glands, entry spouts and even single wires can be used, while still remaining watertight and dust free. With such versatility, these enclosures are extremely economical.

- Direct mount
- Semi rigid polypropylene
- Dust and splash proof
- Contact labyrinth seal
- Temperature range up to 100°C (212°F)
- IP55 protection
- Universal entry seals
- Standard rear knockouts
- Corrosion and maintenance free
- Non-flammable
- Low halogen
- Drainage possibilities for condensed water by drainage inlets
- Metric inlets on all sides

The HP Function

The preinstalled entry seals in the HP Series can accommodate a wide variety of connection possibilities. Large or small cable, cable glands, entry spouts and even single wires can be used, while still remaining watertight and dust free. With such versatility, these enclosures are extremely economical.

PB Series - Push Button

The PB Series features modern, rugged enclosures made of glass fiber reinforced Polycarbonate, designed to protect and insulate 22.5 mm push buttons in dusty, corrosive and wet environments. Five different standard enclosures have pre-drilled mounting holes for up to five switches. Custom enclosures are available in different sizes and hole patterns to suit your specific application. Call Altech for further information.

- Universal fit for nearly all 22.5mm dia. push buttons
- Compatible with the EK and TK Enclosure Series
- Customization services available - design and quantity considerations may apply
- Proven technology with modern design
- Black cover screws are standard with all models
- IP66 / Nema 4X
- UV, weather and impact resistant

Standard Features

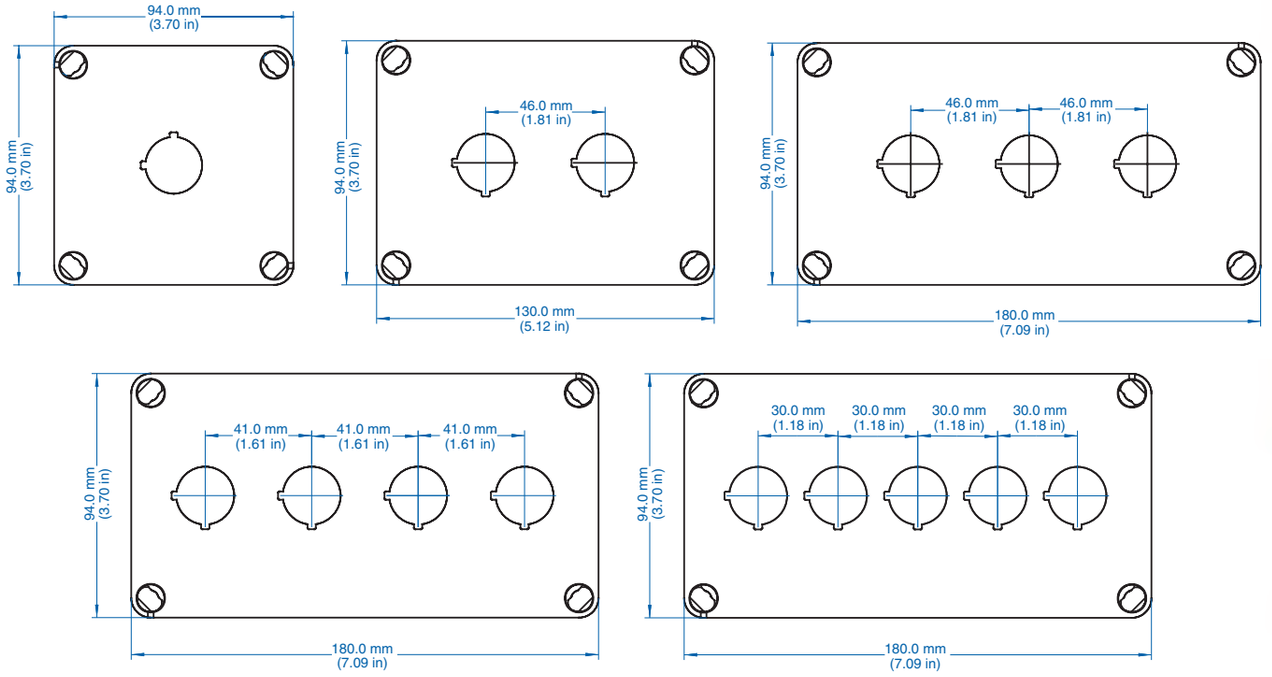

- **Protection Level:** IP66*
- **Technical:** M16/20 Knockout Sidewalls[1]
  22.5 mm Diameter Push Button Holes
- **UL Recognized Enclosure Material:** Polycarbonate
- **Material Temperature Range:** -40˚C to 120˚C (-40˚F to 248˚F)
- **Gasket Material:** Polyurethane
- **Color:** Light Gray
- **Accessories:** See section below

* IP66 when suitable installation devices are used.

Accessories

Carefully selected accessories complement the Altech/Spelsberg Enclosure family. A full line, including connectors for wire, cable, or conduit; ground/neutral busbars, mounting plates and hardware, locks, hinge kits, DIN rails, terminal block assemblies and more are available to enhance the overall design capabilities.

Altech/Spelsberg has the right accessories to make your job easier.

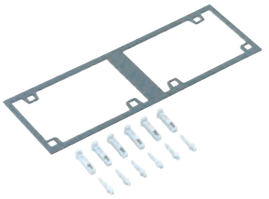

- Liquid Tight Strain Relief connectors and connector assemblies
- Mounting plates
- DIN rail support racks
- DIN rails
- Enclosure mounting screws
- Key lock sets
- Hinge kits
- Cover plates
- Combination kits, flange type
- Ground/neutral busbars

Combination Kits

Used to combine series specific enclosures to make larger units. Connect horizontally or vertically.

Fitting Type Combination Kit
Threaded with locknut seal for connecting sidewalls. Fits standard Metric knockouts. Drilling template included to ensure enclosure ingress integrity.

Pin Type Combination Set
For combining AK and AKL Series Enclosures for 150mm and 300mm sides.

- Increased Cable Range - The specially designed pressure fingers allow for up to 60% wider cable range.
- IP68 achieved without seal rings - The redesigned integral sealing ridge obtains an IP68 protection rating without the use of seal rings.

Material:
- Body: Polyamide 6
- Seal: Neoprene

Technical properties:
- Maximum strain relief through clamping range
- IP68 achieved without seal rings (PG and metric only)
- Trapezoidal thread with high torque guarantees tight and permanent fit of the dome nut
- Gas- and watertight

Applications:
- Machines and devices

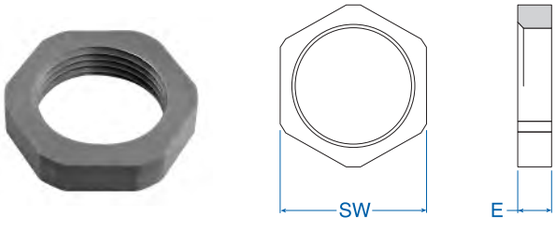

CHART I International Protection (IP) Ratings to IEC 529

Protection Modes to EN 60529 DIN VDE 0470 Part 1			Second Digit – Degree of Water Protection								
First Digit	Person touching	Protection against penetration of foreign bodies	IP X0 No Protection	IP X1 Protection against dripping water falling vertically	IP X2 Protection against dripping water even when tilted 15° vertically	IP X3 Protection against dripping water even when tilted 60°	IP X4 Protection against splashing water from any direction	IP X5 Protection against water jets from any direction	IP X6 Protection against heavy seas from any direction	IP X7 Protection against effects of immersion	IP X8 Protection against submersion
IP 0X	No protection	No protection	IP 00								
IP 1X	Protection against touching with the hand	Protection against large solid bodies > 50mm Ø	IP 10	IP 11	IP 12						
IP 2X	Protection against touching with the finger	Protect. against med., solid bodies > 12.5 mm Ø	IP 20	IP 21	IP 22	IP 23					
IP 3X	Protection against touching with tools, wires, etc., > 2.5 mm Ø	Protection against small, solid bodies > 2.5 mm Ø	IP 30	IP 31	IP 32	IP 33	IP 34				
IP 4X	Protection against touching with tools, wires, etc., > 1 mm Ø	Protection against small, solid bodies > 1 mm Ø	IP 40	IP 41	IP 42	IP 43	IP 44				
IP 5X	Protection against touching with tools, wires, etc., > 1 mm Ø	Protection against internal dust accumulation	IP 50				IP 54	IP 55			
IP 6X	Protection against touching with tools, wires, etc., > 1 mm Ø	Protection against all dust penetration	IP 60					IP 65	IP 66	IP 67	IP 68

In some countries a third digit is added. It gives information about the mechanical properties of the equipment.
This designation has not yet been standardized according to current DIN and IEC regulations.
Devices in this catalogue correspond to digit IP .7.

CHART II NEMA / IP Cross Reference

The chart below provides a cross-reference from NEMA to International Protection (IP) Ratings. This cross-reference is an approximation based on the most current information available. It is not sanctioned by NEMA, IEC, or any other regulatory body. This chart should be used only as a guideline.

UV - Resistance

The degree of weather resistance given by the polycarbonate enclosures used is generally adequate. The enclosures have been tested under practical conditions in tropical regions for many years. If transparent lids are used, it is recommended to protect them against the direct effects of sun radiation.

The American UL testing laboratories have approved several types of the PC series. A part of this examination is the test for UV resistance (UL 746 C).

The weather proof test according to DIN 53 387 / 1000 hours was conducted at the "National Materials Testing Authority" in Dortmund.

Materials tested:	Polycarbonate, 15% GV, gray
	Polycarbonate, transparent
	Polycarbonate, tinted
	Polypropylene, gray

Approval through «Bureau Veritas»

The following program series have been approved (Nr. 2661/2869/BO/OD) and are consequently suitable for installation in ships and shipyards:

- EK- Series distribution boards
- TK- Series empty enclosures

Polyurethane - sealing material

All enclosure types utilize a seal composed of a dual-component, specialty mixture. The seals are halogen-free, chemically resistant and especially temperature resistant. The seals are inserted by robots, are exactly evenly distributed, and have a solid grip on the upper section of the enclosure. Consequently, a secure and safe respect reliable function of the seals is guaranteed.

Protection against condensation

The more tightly sealed the equipment, for example junction boxes or distributor housings, the greater the likelihood of condensation forming. This is especially the case at locations where highly fluctuating temperatures are to be expected. These effects are intensified by the power loss generated in the enclosures.

Owing to the differences in temperature, a difference also arises in the pressure conditions, which causes the enclosure to draw in air when the temperature changes. The next time the temperature increases, the humidity in this air condenses on the cold surface of the housing, for example on the lid. This process is only reversible to a limited extent, so the water collects in the housing.

Since this effect occurs regularly, even daily to an extent, a considerable volume of water may collect internally. If this housing has an increased protection rating, it no longer discharges this water.

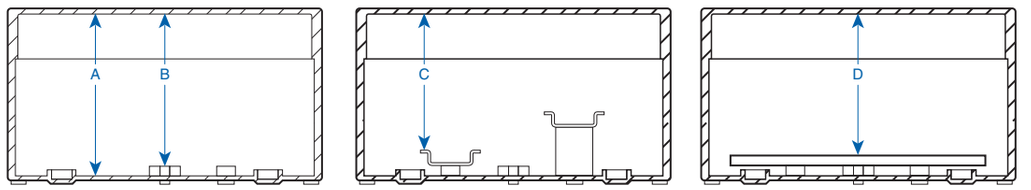

Precautions must be taken with respect to drainage of water if water collects or condensation can occur. We recommend the use of ventilation seals. (see page 150)

Protection against rain / snow (precipitation)

The protection rating tests carried out under DIN EN 60529 and UL 746 C are used as comparative tests and for classification of properties. The tests are limited to a few minutes and cannot emulate frequent exposure to rain / snow or cleaning with water jets. In addition, the local conditions may differ so greatly that a general exposure test cannot be defined.

Installations should be done in protected outdoor areas so that damage cannot be caused by condensation or ingress of water.

Clearance Installation Heights for Spelsberg Enclosures

A) from base bottom
B) from standoffs in base

C) from top of mounting rail NS 35 (mounted on base standoffs)

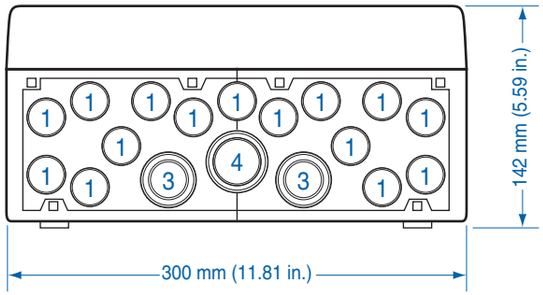

D) from top of plastic mounting plate

STANDARD TERMS AND CONDITIONS OF SALE

TITLE - Title to the products of ALTECH shall remain with ALTECH until payment is made in full by Customer. Such reservation of title is for the purpose of securing the purchase price and shall not relieve Customer of the duty to inspect the products upon receipt, to notify ALTECH of any deficiencies or defects, and to exercise due care in the use, installation, operation, and maintenance of the products when on the premise of the Customer or under the control of the Customer. Notwithstanding any reservation of title by ALTECH, risk of loss shall pass to customer at any time of shipment.

SHIPMENT AND DELIVERY - All orders for destination in the mainland United States (less Hawaii, Alaska and non-continental United States possessions) will be shipped F.O.B. Flemington, N.J. All destination, shipping and other charges shall be paid by the Customer in accordance with ALTECH's then current shipping and billing practices.

Delivery dates given in the acceptance of any order are approximate. ALTECH shall not be liable for delays in delivery or in performance due to causes beyond its reasonable control including acts of God, acts of Customer, acts of civil or military authority, fires, strikes or other labor disturbances, war, riot or delays in transportation. In the event of such delay, the date of delivery or performance shall be extended for a period equal to the time lost by reason of the delay.

PRICE - PRICES in any ALTECH publication are subject to change without prior notification. Catalog prices are based on prices published in the current price list. All written quotations are valid for thirty (30) days from the date of quotation. Customer shall pay all sales, use, excise or similar taxes whenever ALTECH must itself pay and/or collect such tax from Customer arising out of the sale.

PAYMENT - Customer agrees to make payment within thirty (30) days of date of the invoice from ALTECH. Customer agrees to pay a late payment charge of one and one-half percent (1.5% per month, or the maximum late payment charge permitted by applicable law, whichever is less, on any unpaid amount for each calendar month (or fraction thereof) that such payment is in default. Orders amounting to less than $100.00 will be billed at $100.00 plus freight. Full carton purchases are required. In the event of referral to an attorney for collection, reasonable attorney's fees for collection of the overdue amount shall be paid by Customer. In the event payment is not received within 30 days from the date of invoice, any discount shall be cancelled and the full list price will be due.

LIMITED WARRANTY - ALTECH warrants to Customer that the equipment purchases shall be free from defects in material and workmanship under normal use and service for a period of one year from shipment.

Written notice as an explanation of the circumstances of any claim that the equipment has proved defective in material or workmanship shall be given promptly by the Customer to ALTECH.

ALTECH will not be liable for any misuse, improper operations, improper installation, improper maintenance, alteration, modification, accident or unusual degradation of the equipment or parts due to an unsuitable installation environment.

No representation of other affirmation of facts, including but not limited to statements regarding capacity, suitability for use or performance of the equipment, shall be or be deemed to be a warranty or representation by ALTECH for any purpose, nor give rise to any liability or obligation of ALTECH whatsoever.

Customer's sole and exclusive remedy in the event of breach of warranty, as set forth herein, is expressly limited to (1) the correction of the defect by adjustment, repair, modification, or replacement, or (2) issuance of a credit or refund of the purchase price for the defective equipment at ALTECH's election and sole expense.

EXCEPT AS SPECIFICALLY PROVIDED IN THIS AGREEMENT, THERE ARE NO OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

THIS WARRANTY EXTENDS ONLY TO THE CUSTOMER FROM ALTECH OR ITS AUTHORIZED DISTRIBUTOR.

LIMITATION OF LIABILITY - IN NO EVENT, SHALL ALTECH BE LIABLE FOR LOSS OF PROFITS, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER SIMILAR DAMAGES ARISING OUT OF ANY BREACH OF THIS AGREEMENT OR OBLIGATIONS UNDER THE AGREEMENT.

ALTECH SHALL NOT BE LIABLE FOR ANY DAMAGES CAUSED BY DELAY IN SHIPMENT, INSTALLATION OR FURNISHING OF EQUIPMENT OR SERVICES UNDER THIS AGREEMENT.

No action arising out of any claimed breach of this Agreement may be brought by either party more than two (2) years after the cause of action has accrued.

PATENT INDEMNITY - ALTECH shall defend or settle any suit or proceeding brought against Customer based on a claim that any equipment made to ALTECH design and furnished hereunder constitutes an infringement of any existing United States patent, provided (ALTECH) is notified promptly in writing and is given complete authorization and information required for the defense, and ALTECH shall pay all damages and costs awarded against Customer, but shall not be responsible for any costs, expense or compromise incurred or made by Customer without ALTECH's prior written consent. If any equipment is in ALTECH's opinion likely to or does become the subject of a claim for patent infringement, ALTECH may at its option and expense procure for Customer the right to continue using the device, modify it to become non-infringing, but in the event ALTECH is not reasonably able to modify, substitute, or otherwise procure for Customer the right to continue using it, ALTECH will remove such equipment and refund to Customer the amount paid in excess of a reasonable rental for past use.

ALTECH shall not be liable for any infringement or claim based upon use of the equipment in combination with other equipment not supplied by ALTECH or with modifications made by Customer.

The foregoing states the entire liability of ALTECH to Customer arising from patent infringement.

SELLER'S REMEDIES - Should Customer fail to make any payment within ten (10) days of its due date, or fail to perform any other of the Customer's obligation hereunder upon thirty (30) days written notice, or should Customer be or become insolvent or be a party to any bankruptcy receivership proceeding prior to full payment of all amounts payable hereunder, ALTECH may: (a) with or without demand or notice to customer declare the entire amount unpaid immediately due and payable; (b) enter upon the premises where the equipment may be found and remove it (Customer shall assemble the equipment and make it available to ALTECH at a place reasonably convenient to both parties and shall permit and assist ALTECH in effecting the retaking and removal of the equipment); and (c) sell any or all the equipment as permitted under applicable law, applying the proceeds of the sale to payment of the expenses of retaking, repairing and selling the equipment, reasonable attorney fees and to the satisfaction of all indebtedness then due and unpaid under this Agreement. Any surplus shall be paid to Customer and any deficiency shall be paid to ALTECH by Customer.

The remedies provided herein shall be cumulative and in addition to all other remedies provided by law or equity or under the Uniform Commercial Code.

GOVERNING LAW - This agreement will be governed by the Laws of the State of New Jersey.

GENERAL - This Agreement shall only become effective and binding when either (a) it has been accepted and executed by an authorized representative of ALTECH, or (b) the equipment has been shipped to Customer, with or without acceptance in writing hereon. Notice of acceptance is hereby waived by Customer. Customer hereby acknowledges receipt of a true and complete copy hereof.

No addition to or modification of any of the Terms and Conditions of Sale as they appear herein shall be binding upon ALTECH unless signed in writing by duly authorized representative of ALTECH in Flemington, N.J.

Typographical and clerical errors in quotations, orders and acknowledgments are subject to correction.

This Agreement is not assignable without the prior written consent of ALTECH. Any attempt to assign any of the rights, duties or obligations of this Agreement without such consent is void.

If any provision or provisions of this Agreement shall be held to be invalid, illegal or unenforceable, the validity, legality and enforceability, of the remaining provisions shall not in any way be affected or impaired thereby.

ALTECH is not responsible for failure to fulfill its obligation under this Agreement due to causes beyond its control, or except as agreed herein.

THE CUSTOMER ACKNOWLEDGES THAT HE HAS READ THE AGREEMENT, UNDERSTANDS IT, AND AGREES TO BE BOUND BY ITS TERMS AND CONDITIONS. FURTHERMORE, THE CUSTOMER AGREES THAT IT IS THE COMPLETE AND EXCLUSIVE STATEMENT OF THE AGREEMENT BETWEEN THE PARTIES, WHICH SUPERSEDES ALL PROPOSALS OR PRIOR AGREEMENTS, ORAL OR WRITTEN, EXPRESSED OR IMPLIED, AND ALL OTHER COMMUNICATIONS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER OF THIS AGREEMENT.

Circuit Protection Devices

Altech the market leader in UL508 Manual Motor Controllers/ Miniature Circuit Breakers now introduces UL489 Miniature Circuit Breakers and UL1077 Supplementary Protectors. The UL489 versions are DIN rail mounted, 17.5mm wide, thermal magnetic, 240V, 480Y/277V AC, 50/60Hz, 125 and 250 VDC models, with short circuit interrupt capacity of 10kA, a positive trip indicator, and are line/load reversible. The UL1077 versions are DIN rail mounted, 17.5mm wide, thermal magnetic, 480Y/277V AC, 50/60Hz, a short circuit withstand capacity 10kA, have a positive trip indicator.

Safety Relays

Altech has the broadest line of safety relays that meet the New ASME A17.1-2000 specification. Our Safety Relay catalog and flyer outlines a complete selection of the safety relays featuring forced-guided contacts, a mandatory requirement of the European Machinery Directive EMD 89/392 EEC, which makes them indispensable when designing safety circuits for the international market. Our relays are approved for use in safety applications such as Emergency Stop, Two Hand Safety, Safety Gate, or as specified in IEC 204, EN 60204, and DIN/VDE 0113.

DIN Enclosures

Our NEW catalog features many new models plus our current four distinct DIN Rail mount enclosure families with a multitude of sizes and features. Internationally accepted, these enclosures are offered complete with up to 144 ready-to-wire terminals, integral PC Board guides and a selection of terminal-to-board connection options. They can be customized with imprints, markings, cutouts, etc. and snap onto standard 35mm DIN Rails or can be panel mounted. The catalog is complete with technical drawings to assistant you in your designs.

Interface Modules and Industrial Relays

Altech offers a wide range of DIN Rail or panel mount cable interface modules, relay interface modules, power supplies, carrier modules, and custom designed modules. Cable to connector models include: D-Sub connectors, ribbon cable connectors, and Dip socket connectors to terminals. Standard relay modules from 1 to 16 channels, and safety relay modules from 1 to 16 channels and up to 10 poles are included. The catalog also contains a large selection of industrial relays, and custom designed interface modules.

Liquid Tight Strain Reliefs

This 64-page catalog introduces Altech's full line Liquid Tight Strain Reliefs (Cord Grips) which are used to seal cable entries, keep contaminant's from entering enclosures, provide strain relief and thus reduce stress on components and termination points inside enclosures. Available in standard, high-performance, and economy versions, functions include Straight-Through, Increased Strain Relief, Bend Protection, Pull/Bend Protection, Multi-conductor, Flat Cable and EMI/RFI. They can be used with almost any type of cable, cord or conductor - solid, stranded, flat, shielded, high temperature, etc.
