

# State of the Art **SOLID-STATE RELAYS**

## **NO MECHANICAL PARTS**

Solid State Relay's (SSR's) turn on & off the power to devices using solid state components to switch electronically.

Life cycles Up To **50** times longer than standard relays.

- **1ms** on and off times
- 100kA UL SCCR approved
- Produce less electrical interference
- Construction designed to increase lifetime
- Runs silently
- Vibration proof
- IP20 Touch Protection
- Do not create back induction transients
- And many international approvals:

With no mechanical wear,  
they will last for **millions of cycles!**
